

Natural Experiments in the Public Record of AI

The Complete natex Paper Collection

Hauke Hillebrandt

with AI-assisted analysis (natex v0.2.0 and v0.3.0)

Compiled 2026-10-05 • Latest versions: haukehillebrandt.github.io/natex

Contents

1. Systematic Survey (capstone) — the 8 selected findings and full coverage table
2. natex 0.3.0 — methods for automated discovery and calibrated inference (methods paper)
3. Placebo-Calibrated Kink Tests of Four Claimed Trend Breaks in Epoch AI Data — the flagship, rewritten under the 0.3.0 rule
4. A Sharp Bend, No Verdict — US business AI adoption at DeepSeek-R1
5. Bent, Bypassed, Unbowed — export controls and China’s compute (three legs)
6. The +6 pp That Wasn’t Adoption — the BTOS question-rewording measurement RDD
7. A Genuine Bend, No Causal Certificate — hyperscaler capex at ChatGPT
8. Sycophancy Did Not Win Votes — the GPT-4o deploy–rollback episode
9. Bunching Below the Line — missing mass above the EU AI Act’s 10^{25} -FLOP threshold
10. Still No Kink at o1 — precision-weighted ECI rerun on a fresh vintage
11. The Rally, Not the Rule — semiconductor stocks under automated validation
12. An Honest Miss — Chinchilla as an adoption ramp
13. Recovering Proposition 99 Blind — pipeline validation against the ADH benchmark
14. Exact to the Quarter, Lost in the Generation — export controls in chip shipment panels
15. A Sharp Bend, Now Gone — the DeepSeek-R1 adoption kink fails out of sample
16. Teaching to the Test, Undetected — no contamination premium on held-out benchmarks
17. A Break Made of Growth — the 2025Q1 datacenter surge as smooth expansion
18. Manufactured Gradients — state AI exposure and US business adoption at DeepSeek-R1
19. No Kink at R1 — the CVE-publication surge localizes to late 2025

Every estimate from seeded, reproducible runs; nulls and identified artifacts reported as first-class results.
