

Natural Experiments in the Public Record of AI

The Complete natex Paper Collection

Hauke Hillebrandt

with AI-assisted analysis (natex v0.2.0)

Compiled 2026-07-19 • Latest versions: haukehillebrandt.github.io/natex

Contents

1. Systematic Survey (capstone) — the 8 selected findings and full coverage table
2. Three Kinks and a Null — formal trend-break tests (flagship methods paper)
3. A Sharp Bend, No Verdict — US business AI adoption at DeepSeek-R1
4. Bent, Bypassed, Unbowed — export controls and China’s compute (three legs)
5. The +6 pp That Wasn’t Adoption — the BTOS question-rewording measurement RDD
6. A Genuine Bend, No Causal Certificate — hyperscaler capex at ChatGPT
7. Sycophancy Did Not Win Votes — the GPT-4o deploy–rollback episode
8. Bunching Below the Line — missing mass above the EU AI Act’s 10^{25} -FLOP threshold
9. Still No Kink at o1 — precision-weighted ECI rerun on a fresh vintage
10. The Rally, Not the Rule — semiconductor stocks under automated validation
11. An Honest Miss — Chinchilla as an adoption ramp
12. Recovering Proposition 99 Blind — pipeline validation against the ADH benchmark
13. Exact to the Quarter, Lost in the Generation — export controls in chip shipment panels
14. A Sharp Bend, Now Gone — the DeepSeek-R1 adoption kink fails out of sample
15. Teaching to the Test, Undetected — no contamination premium on held-out benchmarks
16. A Break Made of Growth — the 2025Q1 datacenter surge as smooth expansion
17. Manufactured Gradients — state AI exposure and US business adoption at DeepSeek-R1
18. No Kink at R1 — the CVE-publication surge localizes to late 2025

Every estimate from seeded, reproducible runs; nulls and identified artifacts reported as first-class results.
